SPIRIT OF ADVENTURE

Out of the 7.4 billion people on Earth:

4,000
have climbed
Mount Everest

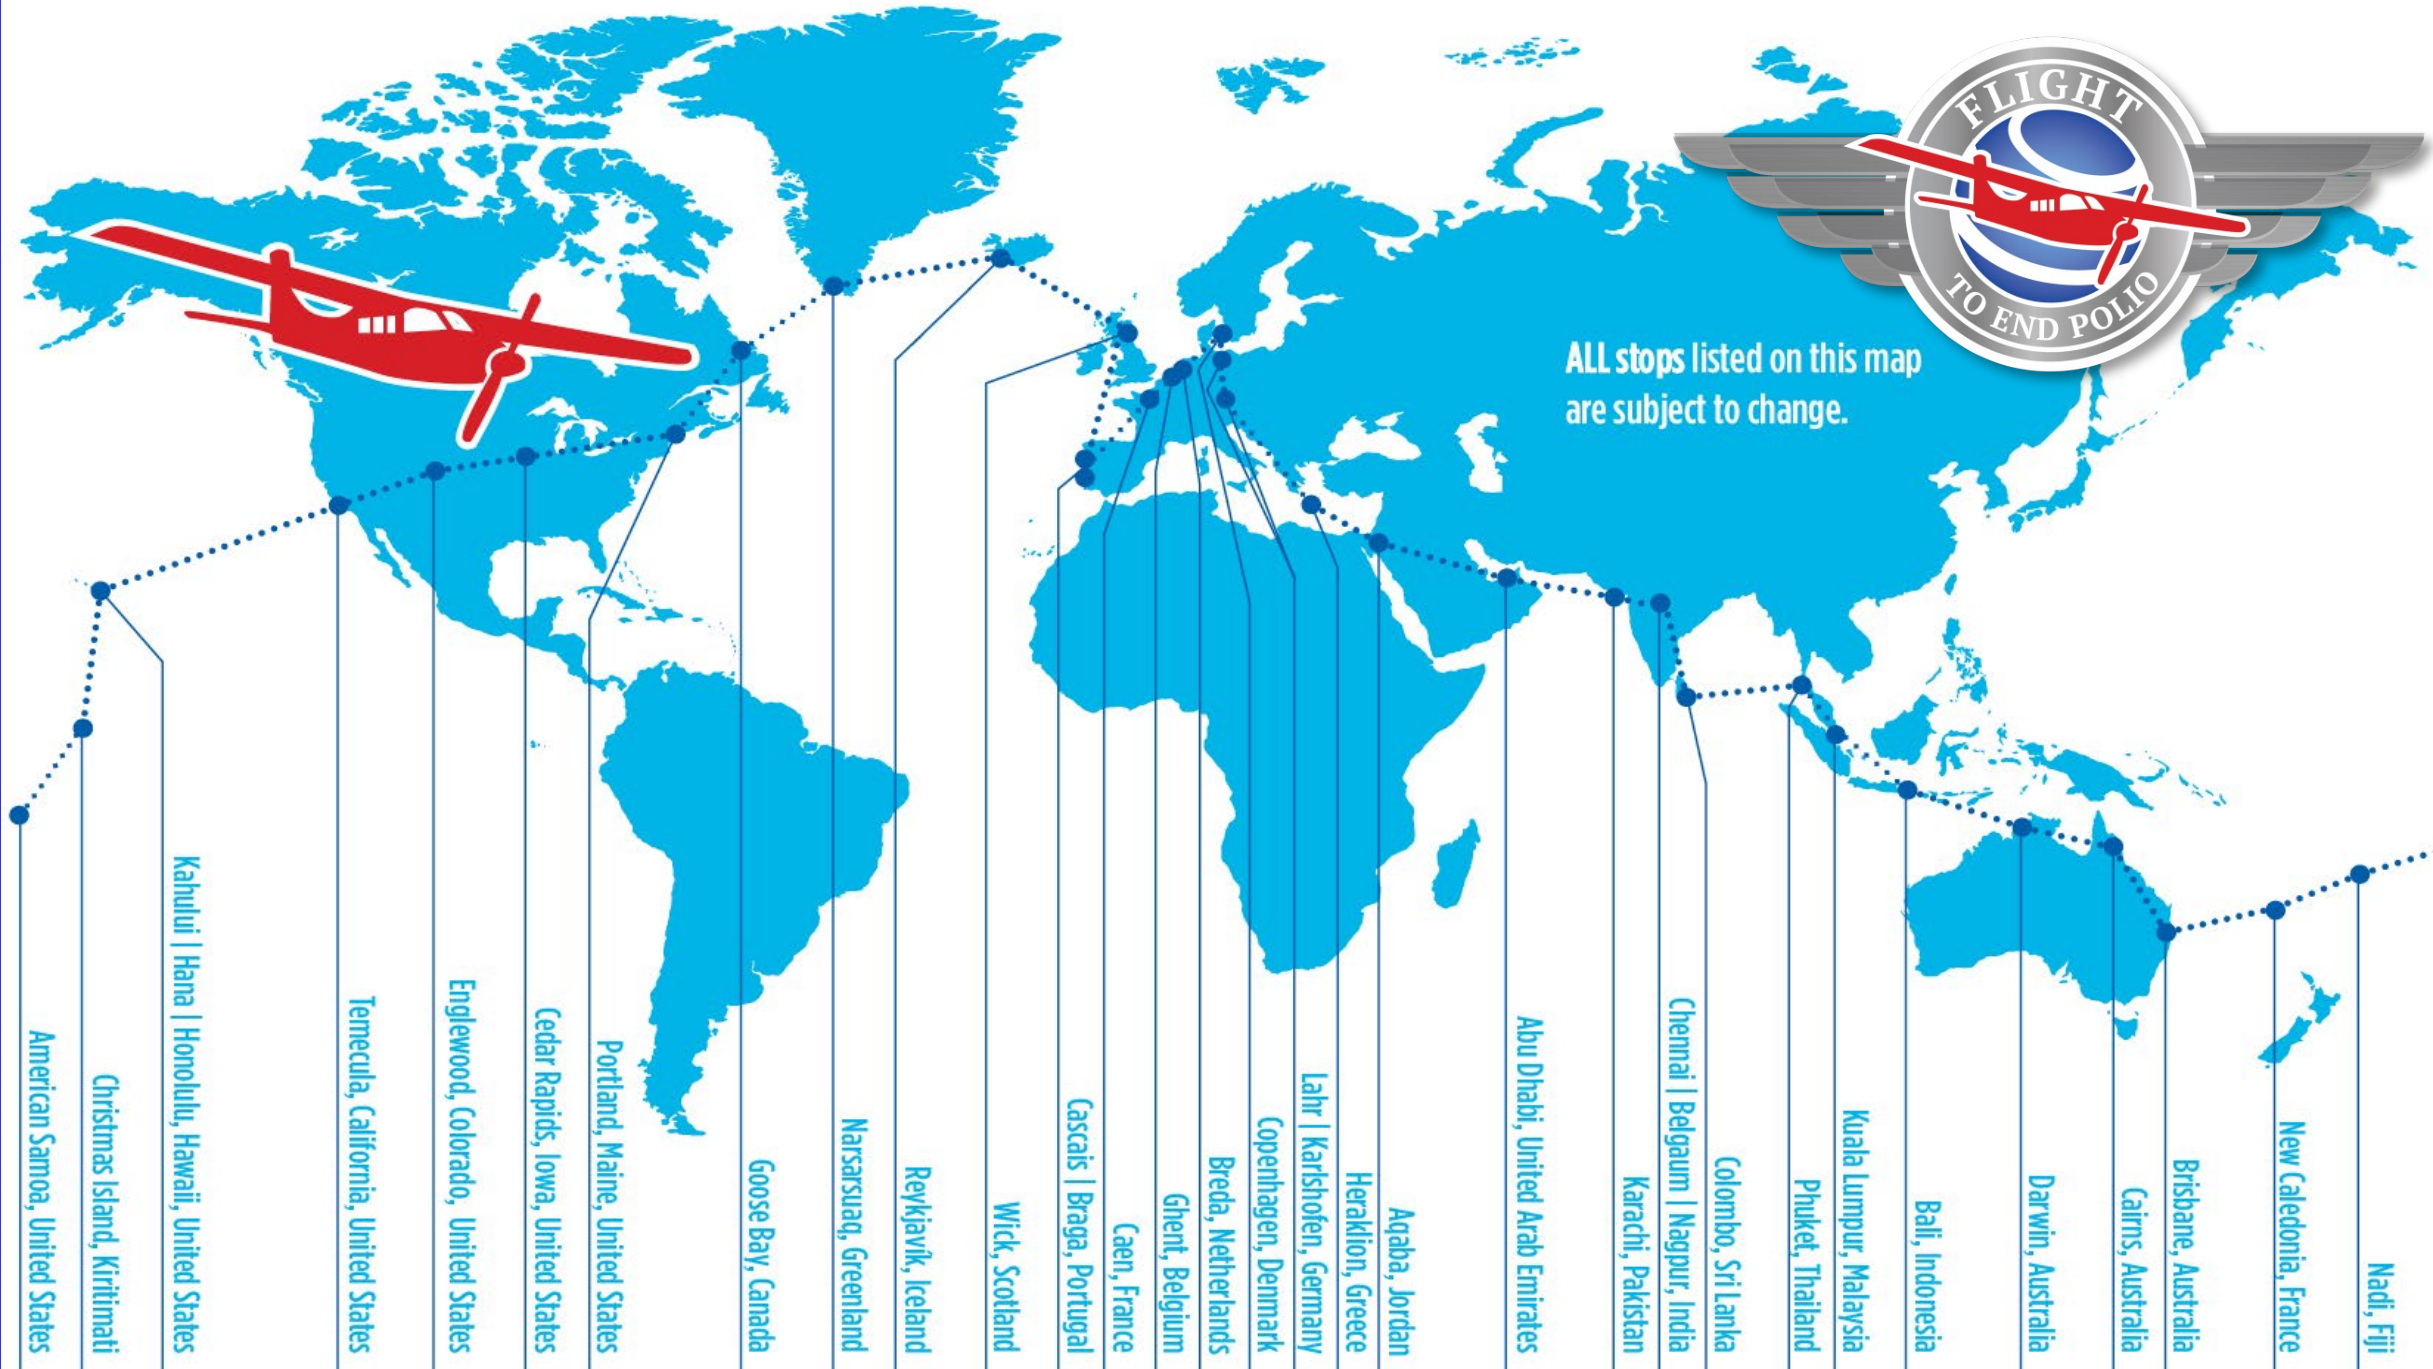

500
have been
in space

ONLY 700 pilots have flown around
the world in light aircraft!
Fewer than 270 of them are alive today.

ALL stops listed on this map are subject to change.

POLIO FACTS

Poliomyelitis (poliovirus or polio) is a highly infectious disease that most commonly affects children under the age of 5.

- No cure but preventable with a vaccine
- Two countries remain endemic
- Cases reduced by 99.9% since 1988
- Every child is at risk until vaccinated

POLIO FACTS

- Spreads person to person, typically through contaminated water.
- Attacks the nervous system and can lead to paralysis.
- Rotary's End Polio Now program has immunized over 2.5 billion children worldwide.

POLIO FACTS

- In the last three years the overall vaccination of children has plummeted.
- Unless eradicated within 10 years, as many as 200,000 new cases could occur around the world each year.
- No child anywhere in the world is safe until we've vaccinated every child.
